

Priority Focus Area 1
Centralized Intake
September 2011

Centralized Intake has been up and running since June. Intake is processing around 5,000 calls and 1,000 police reports per month. Most communities have adjusted to calling the new intake number but we will be doing some advertising in some of the smaller communities to make sure that everyone is aware of the new number. Please make note of the new number: **1-855-323-3237**. Centralized intake is operating 24/7, including weekends and holidays. Please be prepared with as much information as possible when you call intake, including the child's name and address and as much detail as you have about your concerns.
